

RailWire User Guide

WiFi Setup Guide

Step-by-Step Instructions

- 1 Connect the router to power supply.
- 2 Insert LAN cable from modem to router.
- 3 Turn on the router and wait for lights.
- 4 Connect to WiFi using default SSID.
- 5 Login to router settings (192.168.1.1).
- 6 Change WiFi name and password.

Helpful Tips

Keep router in open space for better signal.

Use strong password.

Restart router if connection drops.
